Professional Summary

Recent MCA graduate currently working as a Web Developer at People Prime Worldwide with hands-on experience in HTML, CSS, JavaScript, Python, Django, PostgreSQL, and REST APIs. Skilled in developing responsive web applications and backend functionalities with a strong understanding of full-stack development. Completed a Full Stack web Development internship at VCube Software Solutions, contributing to real-world projects and collaborative development environments. Proficient in Git/GitHub and modern web technologies. Quick learner with strong problem-solving abilities and a passion for building scalable and efficient software solutions.

Education

BV Raju College, Bhimavaram, Andhra Pradesh

Master of Computer Applications (MCA) – cgpa:8.02

Nov 2023 – May 2025

- Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Software Engineering, Web Technologies, Object-Oriented Programming, Operating Systems, Computer Networks
- Academic Projects: Developed multiple full-stack web applications using Django framework and relational databases

Samhitha Degree College, Rajahmundry, Andhra Pradesh

Bachelor of Computer Applications (BCA) – cgpa:7.19

Nov 2020 – Aug 2023

- Built strong foundation in programming fundamentals, database concepts, and software development methodologies

Technical Skills

Programming Languages: Python, JavaScript, SQL

Frameworks & Libraries: Django, Django Templates, Flask

Databases: MySQL, MongoDB, SQLite, PostgreSQL

Tools & Technologies: Git, GitHub, VS Code, PyCharm, Postman

Web Technologies: RESTful APIs, HTML5, CSS3

Core Competencies: Object-Oriented Programming, cloud computing (AWS), computer networks

Professional Experience

Web Developer

Mar 2026 – Present

People Prime Worldwide

Hyderabad

- Developed and maintained the company website, ensuring a clean and user-friendly interface.
- Converted wireframes and design mockups into fully responsive web pages compatible across different devices and screen sizes.
- Integrated API for contact form functionality, enabling seamless form submission and communication workflows.
- Implemented API-based job listings UI integration to dynamically fetch and display job opportunities on the company website.
- Improved website responsiveness, usability, and overall front-end performance for a better user experience.
- Collaborated with the team to implement design updates, fix UI issues, and enhance website functionality.

Web Developer Intern

Mar 2024 – Apr 2024

V Cube Software Solutions

Remote

- Collaborated with development team to design, develop, and deploy full-stack web applications using Java
- Implemented responsive front-end interfaces using HTML5, CSS3, and JavaScript, ensuring cross-browser compatibility and mobile responsiveness
- Designed and optimized relational database schemas, wrote complex SQL queries for data retrieval, and performed CRUD operations efficiently
- Integrated RESTful APIs and implemented authentication mechanisms to secure web applications
- Utilized Git and GitHub for version control, managing code repositories and collaborating with team members effectively

Academic & Personal Projects

DECENTRALIZED ACCESS CONTROL WITH ANONYMOUS AUTHENTICATION | AES, Amazon S3, java, HTML, CSS, SQL

- Architected a decentralized cloud storage system using Amazon S3 and Heroku, implementing AES-256 encryption to ensure end-to-end data security and user privacy. AWS Cloud Practitioner Essentials
- Engineered an anonymous authentication protocol that validates user access without compromising PII, effectively balancing high-level security with user anonymity.
- Mitigated replay attacks by designing a dynamic data distribution strategy, leveraging S3 for resilient storage with periodic location rotation.
- Optimized system performance and cost-efficiency by utilizing AWS global infrastructure, maintaining low computational overhead while ensuring horizontal scalability.
- Developed fine-grained access control mechanisms to manage decentralized permissions, enhancing the overall defensive posture of the cloud environment.

E-CLASSIFIEDS | Java, MySQL, HTML, CSS, JavaScript

- Developed a full-stack E-Classifieds web application using Java and NetBeans, enabling users to seamlessly post, search, and manage listings across diverse categories like real estate and electronics.
- Architected a robust relational database in MySQL, using SQLyog for advanced schema management and query optimization to ensure rapid data retrieval and synchronization.
- Engineered responsive and interactive user interfaces with HTML5, CSS3, and JavaScript, ensuring a consistent user experience across mobile and desktop devices.
- Implemented secure CRUD (Create, Read, Update, Delete) functionality using Java back-end logic to handle listing lifecycles and user data integrity.
- Streamlined data management workflows by designing efficient SQL queries and indexing strategies, reducing page load times and enhancing platform scalability.

DJANGO EXPENSE TRACKER | python, Django, HTML, CSS

- Developed a full-stack Expense Tracker web application using Django framework, implementing secure user authentication and session management.
- Designed and implemented CRUD operations for expense and category management using Django ORM and relational database modeling.
- Implemented user-specific data isolation using Foreign Key relationships and login-protected views (@login_required).
- Integrated custom responsive UI with CSS animations using Django templates and static file handling.

Certifications & Training

AI Literacy Basics: Applying Generative AI in the Workplace – Professional certification demonstrating proficiency in leveraging AI tools

AWS Cloud Practitioner Essentials – understanding of cloud concepts, core services like EC2, S3, and RDS and AWS security best practices

ChatGPT & AI Tools Workshop – Hands-on training in utilizing AI-powered tools for development and productivity

Python for Data Science – Comprehensive course covering data manipulation, analysis, and visualization using Python

Power BI Workshop – Training in creating interactive dashboards and business intelligence reports

Additional Information

Languages: English (Fluent), Hindi (Fluent), Telugu (Native)

Interests: Open Source Contribution, Competitive Programming, Web Development, Cloud Computing

Availability: 60 days (Notice Period)

Strengths: Strong analytical and problem-solving skills, ability to learn new technologies quickly, excellent team player with good communication skills, self-motivated and detail-oriented
